FREE Science Safety Manual Included!
Learning Objectives

If you are the appointed Chemical Hygiene Officer (CHO) for your school or district, this workshop is a must! Learn about the responsibilities and liabilities of being the OSHA Chemical Hygiene Officer who oversees the science laboratories and employees in your school or district. A Chemical Hygiene Officer is the designated employee who is qualified by training or experience to provide technical guidance in the development and implementation of the provisions of the Chemical Hygiene Plan (CHP). The CHP and CHO are required by OSHA’s Laboratory Standard 29 CFR1910.1450. The objective of a CHP is to ensure that all employees who may be exposed to laboratory chemicals are adequately trained in the proper procedures for safer storage, handling, use, and disposal of those chemicals; understands the risks involved in working with chemicals in the laboratory; knows the procedures to follow to minimize exposure to laboratory chemicals; and knows the emergency procedures in case of a spill release or exposure to chemicals. A safer science laboratory can be achieved with proper engineering controls, standard operating procedures, and personal protective equipment.

This training program first reviews the responsibilities required and liabilities assumed by the Chemical Hygiene Officer. It then will focus on the Chemical Hygiene Plan and the CHO’s job description components which need to be addressed. The training program will also introduce other general safety topics that relate to the CHO position.

Participants will receive:
- An introduction to the responsibilities and liability of the Chemical Hygiene Officer.
- An review of Chemical Hygiene Officer job description components.
- Access to additional general safety topics relevant to the CHO position.

Complimentary Reference Book Included!

As part of the registration, participants will be receiving a complimentary copy of Dr. Roy’s latest book titled Science Laboratory Safety Manual. This $99 valued book contains over 450 pages of legal safety standards, better professional practices and other critical information that will be useful for participants on the job site following the safety training program.

Summary

This training program will expose appointed or potentially assigned OSHA Chemical Hygiene Officers to their responsibilities and liabilities of overseeing science laboratories and employees in their school or district.

Audience

This training program is designed for:
- Middle and high school science teachers
- School custodial and maintenance personnel
- Curriculum coordinators
- Science department supervisors/department heads
- Chief building administrators
- School district chemical hygiene officer

PLEASE NOTE:

- This training program is open to both public and private middle and high school institutions in Connecticut.
- Preference will be given to teams including middle and high school science teachers, science administrators, building administrators, and the designated Chemical Hygiene Officer.
- Teams of two or three from a district are highly recommended!!!
- First preference will be given to attendees from previous Chemical Hygiene Plan training programs.
- Participants are urged to bring either an electronic copy (and laptop or netbook) or hard copy of their current CHP if available.

About the Instructor

Dr. Ken R. Roy

Nationally recognized lab science safety compliance specialist.

Dr. Roy is on staff at the Glastonbury Public Schools as the Director of Environmental Health & Chemical Safety. He has been trained as an authorized OSHA training instructor. He serves as the science safety consultant/compliance officer for professional organizations such as the National Science Teachers Association and the National Science Education Leadership Association. He is a syndicated safety columnist worldwide and has authored numerous books on safety. Dr. Roy provides safety trainer/consultant services for CIRMA and CSSN. As manager and senior consultant of National Safety Consultants, LLC, he provides professional services to educational and business communities in the areas of employee and employer safety.
