Learning Objectives

Do custodians/maintainers know what to do if there is a chemical spill? Do they know how to safely work with hazardous chemicals? Do they know how to prevent being shocked when running electrical equipment in or near water? Do they know how to safely climb ladders? Are they aware of hazards when cleaning labs or shops? Can they safely clean up blood? Do select appropriate eye and hand protection for the job? OSHA requires Boards of Education to train new school custodians and maintainers upon their initial assignments and veteran custodians/maintainers when changes are made in dealing with hazards or they have a new job assignment. All custodians/maintainers need to be aware of their district’s Hazard Communication Plan and the multitude of other safety regulations. If you are a new or veteran custodian/maintainer or supervisor for a school district who is in need of the mandated OSHA safety training, this program is for you!

With appropriate safety protocols including the required engineering controls (e.g., ventilation), standard operating procedures (e.g., safety rules) and personal protective equipment (e.g., safety glasses, gloves, etc.), school employees can carry out their responsibility in a safer way. When these protocols are not in place or inappropriate, the potential for accidents and serious injury are real! Safety training topics in this program will include the following: Federal OSHA and ConnOSHA regulations, Reporting Safety Violations, OSHA 300 Log – Safety Report Card, Safety Protocols, First Aid, Appropriate Signage, Electrical Hazards, Fire Safety, Housekeeping, Indoor Air Quality, Green Cleaning, Ladders/Scaffolds, Means of Egress, Hazardous Chemicals, Personal Protection Selection, HazCom Standard, Emergency Preparedness, asbestos, noise, voluntary respiratory and Bloodborne Pathogens.

The training program will acquaint custodians, maintainers, their supervisors, principals and others responsible for custodial/maintenance services in schools to essential legally based safety protocols and liability concerns.

Participants will gain a working knowledge of prudent safety practices in the school environment including:

- Code requirements for OSHA’s mandated Hazard Communication Standards (including the new GHS rules), NFPA, etc.
- Prudent safety practices and legal regulations resources.
- Strategies to promote safer operations and procedures.

Participants will learn how to create and maintain a safer working environment in the school based on legal safety standards and better professional practices.

Summary

Due to high demand for critical safety information and training, we are offering a workshop for new and veteran custodians and maintainers in need of the mandatory OSHA standards like the Hazard Communication Program. It will focus on creating/improving safer working environments in elementary, middle and high schools in concert with mandated safety standards/regulations.

Complimentary Reference Book Included!

As part of the registration, participants will be receiving a complimentary copy of Dr. Roy’s latest book titled Science Laboratory Safety Manual. This $99 valued book contains over 450 pages of legal safety standards, better professional practices and other critical information that will be useful for participants on the job site following the safety training program.

Audience

This training program is designed for:

- Custodians/Maintainers – new or veteran
- School Business Managers
- Custodians/Maintainers Supervisors
- School Administrators
- Anyone responsible for school safety

About the Instructor

Dr. Ken R. Roy
Nationally recognized lab science safety compliance specialist.

Dr. Roy is on staff at the Glastonbury Public Schools as the Director of Environmental Health & Chemical Safety. He has been trained as an authorized OSHA training instructor. He serves as the science safety consultant/compliance officer for professional organizations such as the National Science Teachers Association and the National Science Education Leadership Association. He is a syndicated safety columnist worldwide and has authored numerous books on safety. Dr. Roy provides safety trainer/consultant services for CIRMA and CSSN. As manager and senior consultant of National Safety Consultants, LLC, he provides professional services to educational and business communities in the areas of employee and employer safety.
