

**Preliminary Inventory**  
**Committee on the Education of Scientists Records**  
**Collection Number: 1000-235**

Date: 1946-1952

Number of containers: 1 slim Hollinger box

Brief description of collection:

The Committee on the Education of Scientists Records pertain to work done by the Committee on the Education of Scientists by the Division of the Sciences faculty, under President Butterfield, with the purpose of studying the best methods of undergraduate education of the liberal scientist. The collection contains minutes, reports from various stages of the study, proposals for continued study, revised proposals, correspondence, records of works consulted, and copies of notes on biographies.
